WARNING: Keep your head up. Do not butt, ram, spear, or strike an opponent with any part of this helmet or faceguard. This is a violation of football rules and may cause you to suffer severe brain or neck injury, including paralysis or death and possible injury to your opponent. Contact in football may result in Concussion/Brain injury which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea, or confusion. If you have symptoms, immediately stop and report them to your coach, trainer, and parents. Do not return to a game or contact until all symptoms are gone and you receive medical clearance. Ignoring this warning may lead to another and more serious or fatal brain injury. NO HELMET SYSTEM CAN PROTECT YOU FROM SERIOUS BRAIN AND/OR NECK INJURIES INCLUDING PARALYSIS OR DEATH. TO AVOID THESE RISKS, DO NOT ENGAGE IN THE SPORT OF FOOTBALL. TO ACHIEVE THE MOST EFFECTIVE PERFORMANCE OF A Schutt HELMET, USE ONLY SCHUTT SPORTS REPLACEMENT COMPONENTS. WARNING: Do not attach any accessories that are not supplied by and/or approved to be worn with Schutt helmets. Attachment of accessories not supplied by or recommended for Schutt helmets will void the warranty and could adversely affect the protective capabilities of the helmet. If you are unsure if an accessory is approved, please visit schuttsports.com. Due to differences in head shapes and sizes, adjustments may be needed to achieve proper fit and/or comfort. Please refer to the fitting instructions booklet included with each new Schutt helmet. Also available at schuttsports.com. Using jaw pads from suppliers other than Schutt Sports will void the warranty.

VICIS

THE NEXT LEVEL IN DESIGN, PROTECTION, AND PERFORMANCE

With athlete safety at it's core, the VICIS ZERO2 sets the new standard in impact mitigation. The VICIS ZERO2 helmets outperformed all other helmets tested in the NFL and NFLPA's Annual Laboratory Testing.

Laboratory tests are intended to represent impacts common in play, although results may not necessarily represent all conditions or on field performance.

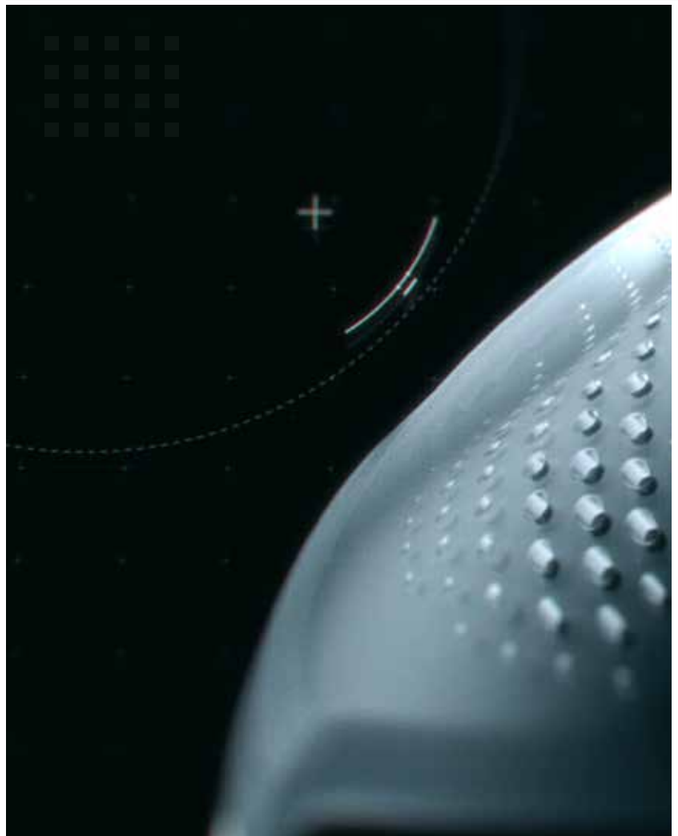
VICIS ZERO2

A TRULY MULTI-LAYERED HELMET SYSTEM

Developed by VICIS' innovative team of engineers and designers, the ZERO2 takes a revolutionary approach to offer out-of-the-box thinking for a completely reimagined helmet. The ZERO2 is more than 15% lighter than its predecessor ZERO1, and allows the athlete to dial in fit, comfort, and performance to elevate their game.



VICIS ZERO2

01 DEFORMABLE OUTER SHELL

Flexible outer shell technology, exclusive to VICIS helmets, allows the ZERO2 to respond like no other helmet on the market. By deforming like a car bumper, impact forces are absorbed at the point of contact, before they reach the head. The result is not only groundbreaking protection, but a helmet that feels like no other.

02 VICIS RFLX 2.0

Optimized for the ZERO2, VICIS RFLX 2.0 continues to leverage buckling structures, but has evolved the design with an array of columns interconnected by thin, flexible walls. The result is greater impact performance at a lower weight, allowing VICIS to further tune impact performance in key locations.

03 REINFORCED INNER SHELL

The inner shell has been engineered through data collected from hundreds of head shapes to optimize fit accuracy, maximize player comfort, and accommodate a wider range of players.

04 DLTA FIT SYSTEM

Raising the bar for personalized comfort and secure fit, the VICIS DLTA pod system is comprised of two layers: impact on the RFLX side, and comfort against the player's head. Fully interchangeable pads across 6 locations in multiple thicknesses translates to virtually unlimited customization without the need for air bladders. Updated pod materials provide upgraded comfort and improved durability.

GROUNDBREAKING NEW APPROACH

The ZERO2 features a new and innovative approach to VICIS' RFLX structure to reduce weight without compromising on performance, a streamlined new design, and an array customization options available to each athlete.

ENHANCED FIELD OF VIEW

Optimized vertical and horizontal sightlines provide the athlete maxmium situational awareness so they can perform at an elite level.

SIGNIFICANT WEIGHT REDUCTION

The ZERO2 is more than **15% lighter** than its predecessor ZERO1, and allows the athlete to dial in fit, comfort, and performance to elevate their game. Designed like no helmet before it, the ZERO2 is a combination of science, safety and sports equipment that is built for serious players.

EDGE SHIELD by Oakley CLEAR

Designed exclusively for the ZERO2 and engineered for optimal vision, the EDGE Shield offers players enhanced safety and performance by providing the sharpest vision with minimum distortion.

TITANIUM FACEMASK

All new facemasks built exclusively for the ZERO2, available in both titanium and tubular stainless steel. Titanium facemasks are 30% lighter than the tubular steel on the standard Zero 2.

QUARTER TURN ATTACHMENT SYSTEM

¼ Turn lower facemask connection allows for a very quick removal or attachment of the ZERO2 facemask, especially when paired with the RAPID Mount upper connection.

FUSION ELITE CHINCUP

Custom built for the VICIS ZERO2, the Fusion Elite Chincup features a deformable upper panel for improved comfort, streamlined strap routing, and shell integration without sacrificing protection.

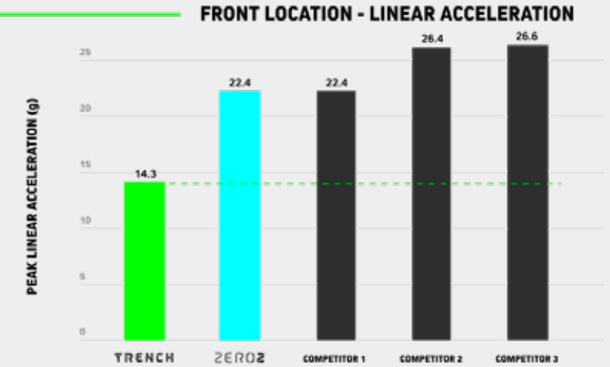
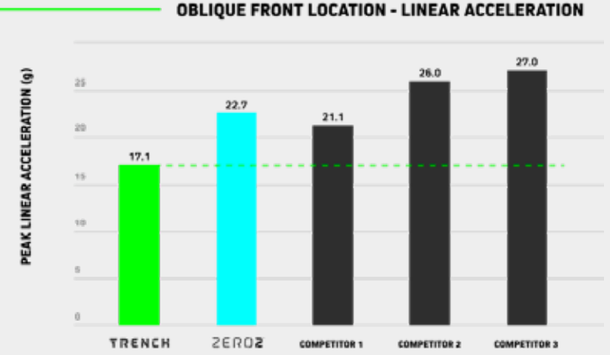
VICIS
ZERO2 TRENCH

THE FIRST EVER POSITION-SPECIFIC HELMET.

Flexible outer shell technology, exclusive to VICIS helmets, allows the ZERO2 TRENCH to respond like no other helmet on the market. By deforming like a car bumper, impact forces are absorbed at the point of contact, before they reach the head. Combined with the additional offset and proprietary structure of the TRENCH, the result is improved impact mitigation for every type of hit.

WATCH THE ZERO2 TRENCH FEATURES VIDEO // CLICK OR SCAN QR CODE





Ø2 TRENCH

HOW WAS IT DESIGNED?

Linemen experience more than twice as many impacts as other players, with the largest percentage of hits to the front of the helmet.[1] The majority of those impacts are low velocity between 2.1 and 4.5 m/s.[2] Based on this data, the TRENCH helmet was designed with additional offset in the frontal region, specifically tuned for low velocity impacts. To complete this optimization VICIS leveraged the combination of a deformable outer shell and engineered impact structure.

WHAT ABOUT HIGH VELOCITY IMPACTS?

At the core of this helmet sits the ZERO2, designed from the ground up for 2021. Guided by the latest NFL/NFLPA helmet protocol, the ZERO2 was optimized for 5.5, 7.4, 9.3m/s.

VICIS

0Z TRENCH™

POSITION SPECIFIC DESIGN

The TRENCH builds upon the game-changing ZERO2 helmet platform, utilizing a soft deformable shell specifically designed to better protect on impacts that occur play after play.

FEATURE SET INCLUDES:

- RFLX 2.0
- VICIS DLTA FIT SYSTEM
- VICIS FORM LINERS
- RAPID MOUNT FACEMASK ATTACHMENT
- TUBULAR STAINLESS STEEL FACEMASK
- FUSION CHINCUP

HELMET RATING
5 ★★★★★

PRICING

MSRP $899.99 // MSRP $999.99 | ELITE

POSITION SPECIFIC HELMET

The game's first position-specific helmet. Designed for Linemen, the additional offset of the TRENCH helmet in the front and upper side is designed to mitigate repetitive low velocity impacts (2-4 m/s).

EXCLUSIVE NEW MASK OPTION

Introducing the **S0-215**, a new mask design available excusively for the ZERO2 TRENCH. The S0-215 offers the same optimized vertical and horizontal sight-lines to provide the athlete maxmium situational awareness.

HOW WAS TRENCH OPTIMIZED?

Using the same linear impact ram found in the NFL/NFLPA lab, VICIS completed testing at the front and oblique front locations, focusing on reducing acceleration at low velocity impacts. The ZERO2 TRENCH **outperformed every other helmet** tested in the Virginia Tech Helmet Rating system.

TUNED FOR YOUTH

ZERO2 Youth comes with tweaks in the impact aborption that are **finely tuned** to the lower impacts of the youth game. The difference comes in the RFLX 2.0 system, buckling columns that help absorb impacts. The columns are designed for velocities seen at the youth level and the same performance is delivered at a lower weight.

ENHANCED FIELD OF VIEW

Optimized vertical and horizontal sightlines provide the athlete maxmium situational awareness so they can perform at an elite level.

PROTECTION & PERFORMANCE

Protection and performance born from the industry-best ZERO2, optimized for kids and the game they play. VICIS reinvented the football helmet when it launched its top-ranked ZERO2 to NFL and NCAA teams . We are now bringing that same scientific rigor and creativity to youth football with the introduction of the ZERO2 YOUTH.

VICIS ZERO2

HELMET FITTING GUIDE

1. Familiarize yourself with the different fit zones in the helmet- Top/Sides/Back/Occipital/Stabilizer Pads/ Form Liner.
2. The front pad is not a fit adjustable item in the helmet.
3. Test Fit the helmet on the Athletes Head. Note the starting point "out of the box" fit is: Occipital-0.625", Top/Side/Rear-0.5", Form Liners installed.
4. **Rear** – If the helmet is too loose front to back, adjust the rear two DLTA pods by exchanging to thicker pod options to snug up the fit.
5. **Top** - If the helmet sits too high, move Athlete to the next size up in the helmet.
6. **Top** - If the helmet sits too low, adjust the Top DLTA pod for optimal brow height (front edge of helmet should be 1" above the brow)
7. **Sides** – If the helmet is too loose side to side, adjust the side two DLTA pods by exchanging to thicker pods to snug up the fit.
8. **Sides** - If the helmet is too tight side to side or excessive temple pressure, remove the form liners behind the DLTA pods.
9. **Occipital** – If the helmet is too loose or gapped at the occipital, adjust the occipital DLTA pods by exchanging to a smaller or larger size.
10. **Occipital** – If the Helmet is too tight at the occipital, remove the form liner behind the occipital DLTA fit pod
11. **Stabilizer Pad** – Adjust the stabilizer pads to desired comfort level by exchanging to thicker or thinner pads, creating just enough pressure to compress the cheeks.
12. **Fit** - The helmet should be snug but not uncomfortable. New parts will conform to Athlete's head shape during the first few uses.
13. **Chin Strap** – Adjust the chin strap upper then lower lengths. When upper length set, cut strap 1" from top of buckle and tuck remaining length into shell slot.

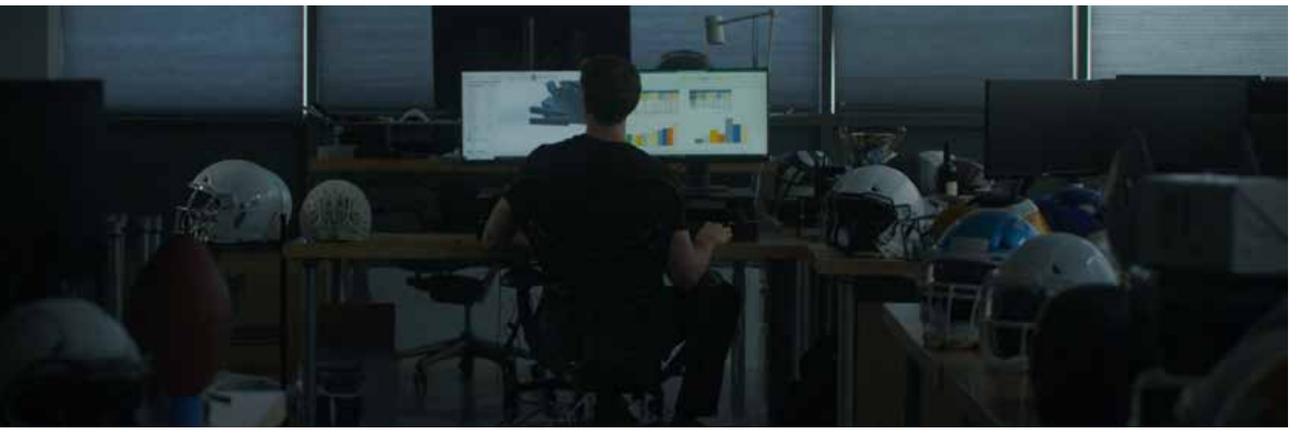
DLTA POD INSTALLATION & REMOVAL TIPS:

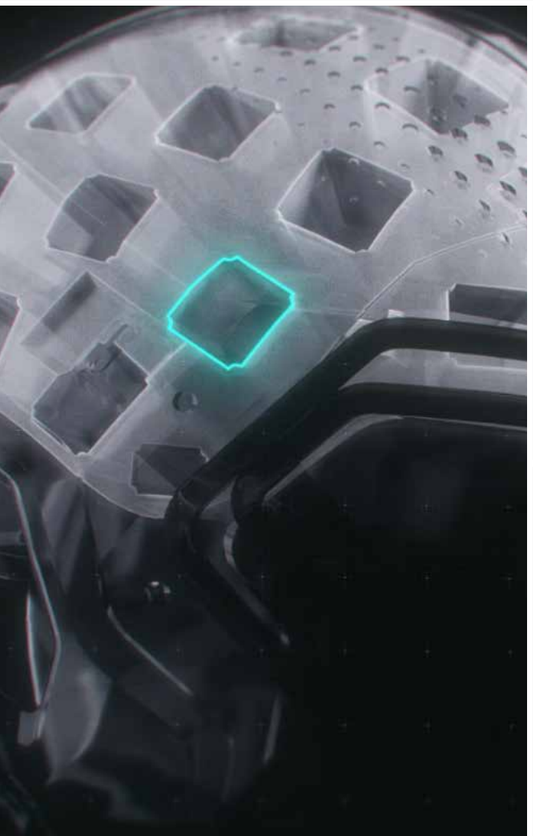
INSTALL

- Fold pod in half along base axis.
- Align the point of the snap post into the matching triangular hole in inner shell.
- Push down with thumb or knuckle in center of pod while helmet is on a solid surface.
- Listen for audible snap.

REMOVAL

- Slide finger under pod base as far as possible (longest side).
- Pry base up and away from inner shell.





02 MATRIX ID

PARADIGM SHIFTING PROTECTION

The MATRIX system is a microfilament structure which is a replacement to the DLTA fit system for the MATRIX helmet.

MATRIX provides ultimate flexibility in the fitting process without having to wait for a custom manufactured helmet. By providing multiple unique fit contours per location and adjustable comfort top layers, the MATRIX pods are ready for gameplay out of the box. This allows for immediate fit feedback from players that can be adjusted at any time.

Similar to DLTA pods, MATRIX pods deliver customized comfort and a secure fit without air bladders. This is accomplished by unique biofidelic contoured pads which elevates the locked-in fit of the ZERO2 MATRIX.

VICIS

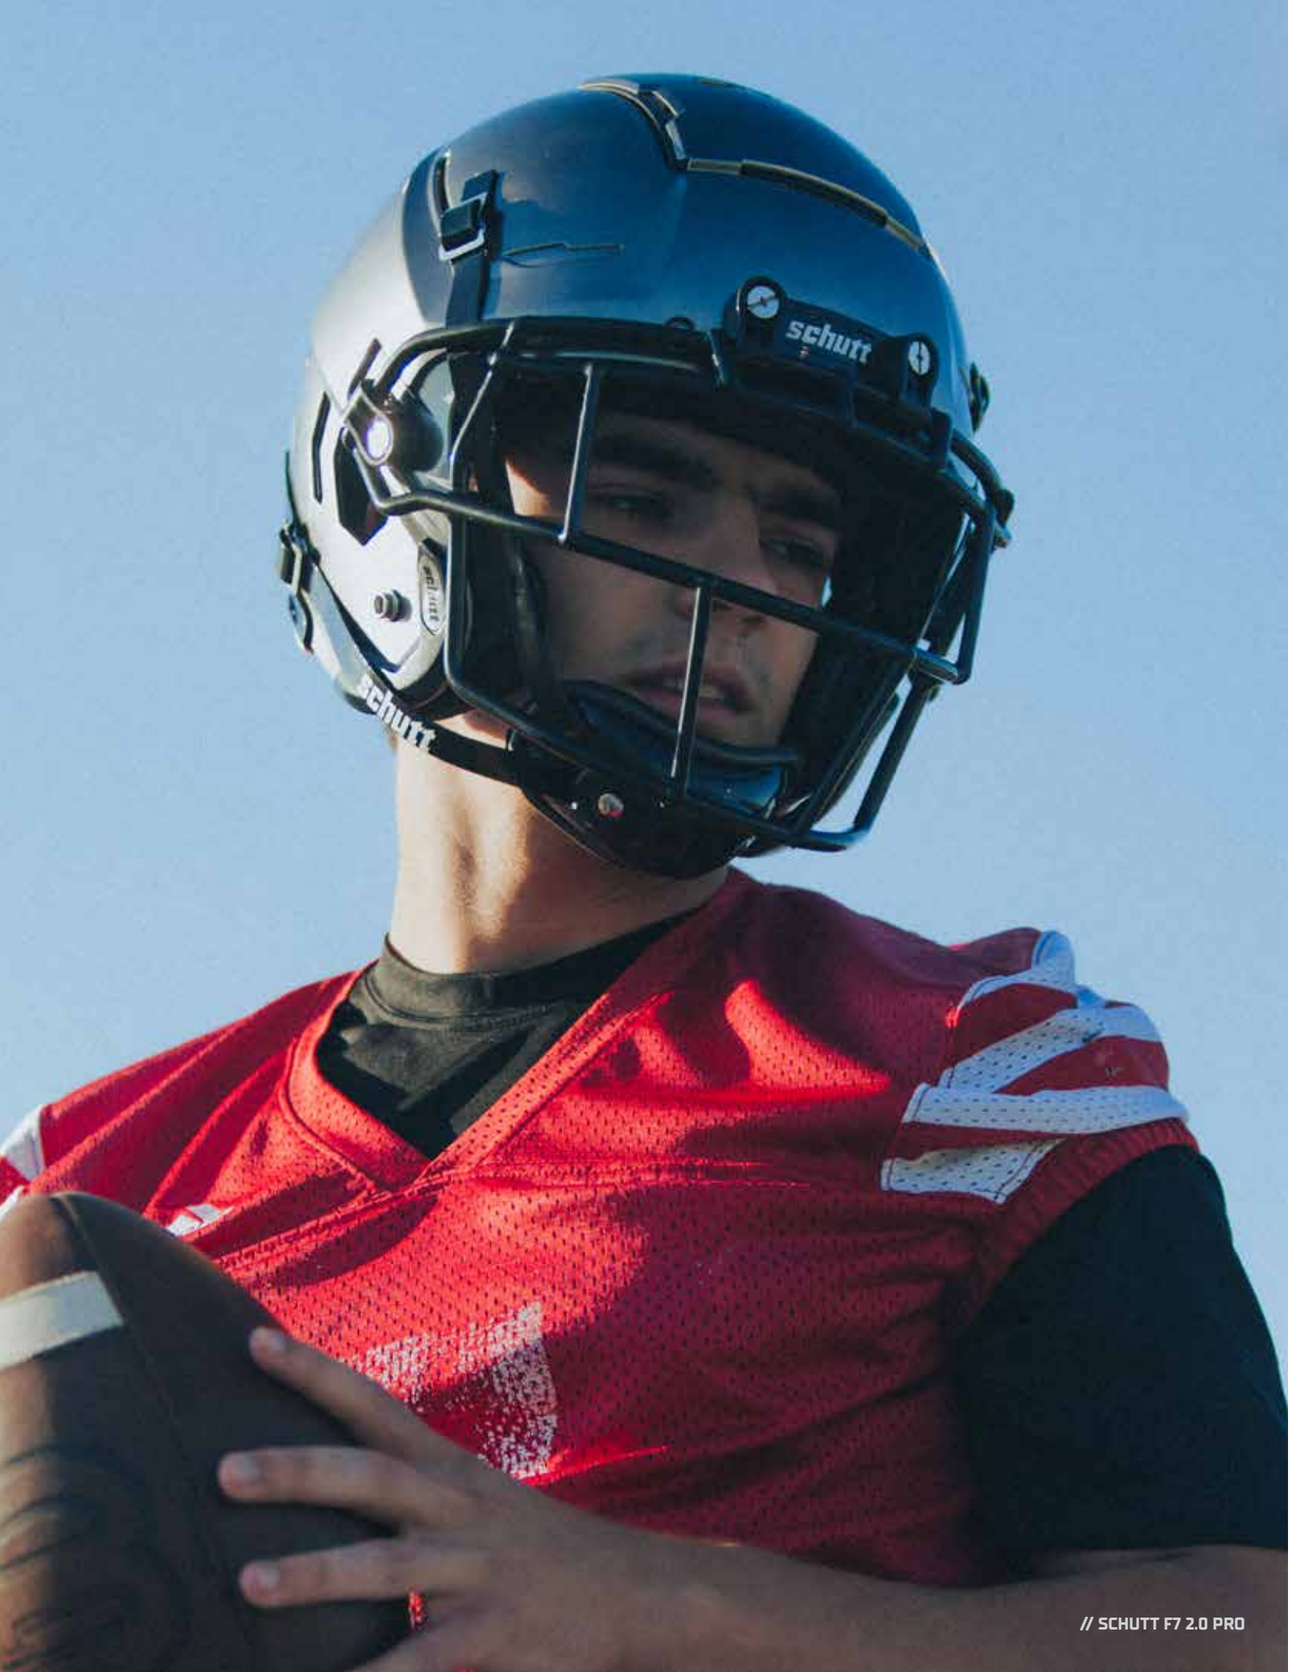
DEDICATION

The price of success is hard work, **dedication** to the job at hand, and the determination that whether we win or lose, we have applied the best of ourselves to the task at hand.

schutt

BUILT FOR BATTLE

Far from the game, the lights, the fever, There is a company on a mission. Driven by a relentless dedication to the player. At Schutt Sports, we build gear for performance. We build gear for protection. We build gear for players. It takes decades of constant technological advancement; in every helmet, in every shoulder pad, in every product. It takes people in the lab committed to pushing the limits of engineering. It takes an entire company committed to the Science of Domination.



// SCHUTT F7 2.0 PRO

VIRGINIA TECH.
HELMET RATING
5 ★★★★★

SCHUTT
VARSITY HELMETS

F7 2.0

The Schutt F7 2.0 utilizes the same iconic styling of the original F7, but with improved impact performance for maximum athlete protection and increased athlete comfort. The Schutt F7 2.0 recorded a **top rating in the Virginia Tech Performance Helmet ratings**

F7 UR1 2.0

As Footballs most customizeable helmet, the UR1 2.0 maximizes an athlete's fit for maximum performance. With computer pressure mapped pods, UR1 2.0 empowers athletes and equipment managers to skillfully adjust helmet pressure and fit to compensate for changes the athlete experiences, to environmental conditions.

F7 VTD

The F7 VTD earned a **5-star safety rating in the Virginia Tech Helmet Ratings**. With plenty of protection and packed with technology, the F7 features five layers of protection and a unique liner system that promotes independent movement.

Vengeance PRO LTD II

Low-profile helmet shell and an inflatable SUREFIT air liner - along the back and sides. Equipped with TPU Cushioning, which won't take a compression set, even after thousands of impacts. The liner on the helmet wraps itself around the player's head, evenly distributing the pressure and weight providing a comfortable fit.

F72.0 HELMET TECHNOLOGY

The Next Evolution of the Game's Most Dynamic Helmet

The Schutt F7 2.0 incorporates a completely redesigned impact layer, an expanded Tektonic plate system for load distribution, and a completely re-engineered fit platform, all housed within the game's most dynamic outer shell. The result is the same iconic styling of the original F7, but with improved impact performance for maximum protection and increased athlete comfort.

01

RFLX-S

The Schutt F7 2.0 features a similar RFLX impact layer found in the industry redefining VICIS ZERO2, but optimized to respond to impacts in unison with a rigid outer shell and Schutt's Tektonic Plate System. RFLX-S is a proprietary buckling layer that employs a series of columns designed to absorb and deflect impact forces before they reach the athlete's head.

02

TEKTONIC PLATE LOAD MANAGEMENT SYSTEM

The Schutt F7 2.0 now incorporates interior Tektonic plates which improve impact distribution across the entirety of the helmet. Building upon the exterior plates synonymous with the original F7 design, the expanded Tektonic plate load management system is a key component that contributes to the 2.0's improved impact performance.

03

AIR ASSISTANCE

The F7 2.0 features a single inflation point to help athletes personalize their fit through the addition of air within the contoured air pocket. Now relocated to the rear bumper of the helmet, the fast access inflation point is designed for ease of use by athletes, parents, and equipment managers alike.

04

INCREASED ATHLETE COMFORT AND IMPROVED FIT FLEXIBILITY

The F7 2.0 introduces an all new adaptive fit system that provides unrivaled flexibility and superior comfort. Newly designed impact sensitive pods combine a comfort layer with a D30 rate-sensitive dampening layer. To improve the range of fit dynamics unique to each athlete, the helmet liner integrates an industry first stacking pod system in five locations. This Tear-Away pod system makes for a quick and easy fit system using geometry interlock and Velcro.

VIRGINIA TECH
HELMET RATING
5 ★★★★★

VIRGINIA TECH TOP RATED HELMET

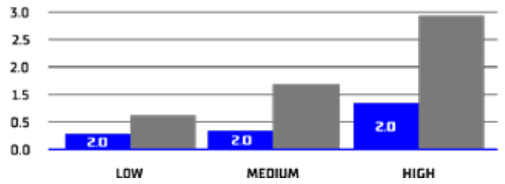
The Schutt F7 2.0 recorded a top rating in the Virginia Tech Performance Helmet ratings, with a Five Star Rating and an extremely high performing score of 1.35. Only the VICIS ZERO2 scored better on Virgina Tech's Performance testing.

NOT YOUR AVERAGE 5-STAR HELMET

Not all five star helmets are created equal. The F7 2.0 tested signifigantly better in impact performance than the average five star rated helmet in the 2022 Virginia Tech helmet ratings.

HELMET SIZE CHART

HELMET SIZE	HEAD SIZE	HEAD CIRCUMFRENCE	HSS PADS INCLUDED
Medium	6½ – 7	20½ – 22"	¾" - 1"
Large	7 – 7½	22 – 23½"	½" - ¾"
X-Large	7½ – 8	23½ – 25"	½" - ¾"



The graph compares this helmet's performance to the average 5 star-rated helmet at the 3 impact severities. Lower values for the score contribution indicate better performance. (Source: Virginia Tech)

F7 VTD
HELMET TECHNOLOGY

Full of Technologically Advanced Features

Look Good. Feel Good. Play Good. While the F7 line of helmets by Schutt sure look the part, they also pack advanced design, exceptional comfort, and technology into that overall stunning appearance. The F7 lineup provides the protection needed for the gridiron. What will you be wearing this season?

01
Tektonic Plate Technology

Located in the most impacted areas of the helmet, Schutt's 3-dimensional movement tectonic plates incorporate an additional TPU Cushion and move independently of the helmet, improving the helmet's performance against rotational forces.

02
Helmet Stabilization System (HSS)

Incorporating a larger, more comfortable jaw pad configuration, the F7 VTD's Stabilization System utilizes both internal and external jaw stabilizers and high-performance impact foam to give the athlete a secure, locked-in feel.

03
Optimized Shell Design

The highly engineered outer shell provides maximum protection in one of the games most iconic designs.

04
SUREFIT Air Liner

The F7's fit system allows each athlete to dial in their unique fit preferences with a variety of different liner thicknesses available.

05
Rapid Release System

The Rapid Release System features our Quarter Turn Release Faceguard hardware in all 4 attachments points. You can attach or remove a faceguard in seconds with 4 small turns of a screwdriver.

06
Updated Internal TPU

The F7 VTD's internal TPU configuration allows for optimized impact management in a lightweight design. TPU (thermoplastic urethane) cushioning absorbs more impact across a wider variety of temperatures than any other helmet on the field.

// The F7 VTD recieved a 5-Star Rating in the Virginia Tech helmet protocols.

VARSITY HELMET FEATURES & FITTING GUIDE

INFLATABLE

Measure the player's head as shown, 1" above the eyebrows around the widest part of the head, using the chart on helmet pages for size guideline.

Lubricate the pump needle generously and insert needle as shown. Do not force the needle into the port; doing so may puncture the liner's opposite wall.

Begin with bottom inflation port on back of helmet. Perform 1-3 pumps. Helmet should be snug against player's head but not overly tight. Excess air is released with valve.

When finished, repeat for top inflation port. Proper inflation will usually require 0-2 pumps, but that may vary.

Helmet's front edge and nose bumper should be approximately 1" above the player's eyebrows.

Attach chin strap to the helmet underneath the faceguard, never above it. Tighten chin strap to be snug and centered on the chin.

Jaw pads should be snug against the player's face, flush with his jaw, without pushing too forcefully into his cheeks.

The helmet should fit snugly, without being too tight. There should be no independent movement of the helmet.

NON-INFLATABLE

Measure the player's head as shown, 1" above the eyebrows around the widest part of the head, using the chart on helmet pages for size guideline.

Attach chin strap to the helmet underneath the faceguard, never above it. Tighten chin strap to be snug and centered on the chin.

Jaw pads should be snug against the player's face, flush with his jaw, without pushing too forcefully into his cheeks.

The helmet should fit snugly, without being too tight. There should be no independent movement of the helmet.

Attach chin strap to the helmet underneath the faceguard, never above it. Tighten chin strap to be snug and centered on the chin.

Jaw pads should be snug against the player's face, flush with his jaw, without pushing too forcefully into his cheeks.

The helmet should fit snugly, without being too tight. There should be no independent movement of the helmet.

AQUA TECH ORDERING TIPS

All helmets that will receive Aqua Tech finishes must be painted first. Some Aqua Tech patterns work better on lighter paint colors, while others look their best on darker paint colors. Look for these symbols on the above swatches to pick the best pattern for your custom order!

Works best on LIGHT COLORS

Works best on DARK COLORS

Our custom color finishes add a sleek and dramatic touch of color to your customized helmet. Extended use, however, will quickly diminish the appearance of this paint style. We recommend Game Day Use Only faceguards paint style be reserved for game day use only and not be used for day-to-day practice.

Aqua Tech patterns can be applied to any of our faceguards. The patterns shown are just samples of what you can choose from. For the full Aqua Tech library, please see page 69-70

RECONDITIONING

GET STARTED WITH SCHUTT RECONDITIONING & RECERTIFICATION

As a NAERA member licensed by NOCSAE we meet and exceed industry standards. All helmets are tagged with RFID tracking labels to record important information and allow easy identification throughout the process. All interior parts and faceguards are removed allowing better inspection, cleaning and sanitizing. Internal parts are reinstalled in the same helmet and rejected parts are replaced with new OEM parts. Shells are inspected, cleaned, sanitized and prepped for finish. Paint or polish. New recertification, NOCSAE, warning, size and initial season labels installed.

- Simple and Transparent
- Online Order Management
- Online Tracking
- Online Reporting
- Online Order Management
- Simple Order Entry for Recon and New Equipment
- Automated Order Acknowledgements
- Faceguard recoating and certification
- Access to Order History
- Inbound Tracking
- Outbound Tracking
- Real Time Status Updates throughout Process
- Inventory Reports
- Reconditioning History Reports
- Parts Replacement Reports

SHOULDER PAD FITTING GUIDE

INDENTIFY

Identify the player's position and choose the appropriate Schutt shoulder pad model.

MEASURE SHOULDERS

Measure the width of the shoulder span, from the right to left tips of the humerus, using a cloth measuring tape.

MEASURE CHEST

Using the cloth measuring tape, wrap around the player's torso to measure the player's chest circumference.

PUT ON PADS

Determine the proper size of shoulder pad (from the measurements) and place them onto the player's shoulders.

SECURE STRAPS

Buckle the belts then connect any straps that the shoulder pad uses. Ensure a good, tight fit in the chest and back areas.

CHECK FIT

Ensure the shoulder pads are providing proper front coverage by confirming the pads cover the sternum, as well as the front upper shoulders.

ENSURE FIT | FRONT

Check the collar and neck area to ensure there is no pinching and the fit is not too tight.

ENSURE FIT | BACK

For proper coverage in the back, confirm the pads are covering the scapula and rhomboid areas. The player should have maximum range of arm motion.
